Projects

| MY SMART CLINIC

A website that used laravel as framework, PHPMyAdmin, MySQL, CSS, HTML, PHP, and Bootstrap.

I develop this system as my final year project. This system will help the user to get their medical report, make an appointment and other. This is a specific system for Pusat Kesihatan UKM.

| SMART RECYCLE KAJANG

A website that used laravel as framework

It is my group work, I and my group for this in three semesters starting from analysis until we develop it into a system.

- Website for Kajang communities to recycle their items with Majlis Perbandaran

Kajang (MPKj). It allowed the user to view transaction history, order their recycle items, generate report and many more.

| DESIGNING WORK

It is for college program which is T-shirts and Banner.
